# Tools & Accessories

## WHITE UNITS

**Tools and accessories stored in the black velvet hardware bag include:**

1 - T-handle tool.

14 – Stainless steel, 1/4-20 hex head bolts (spares are included).

1 - Allen wrench (hex keys) used for repairs only.

## BLACK UNITS

**Tools and accessories stored in the black velvet hardware bag include:**

1 - T-handle tool.

14 – Black, 1/4-20 hex head bolts (spares are included).

1 - Allen wrench (hex keys) used for repairs only

# Assembly Instructions

## 1. Bottom tube preparation

Place the bottom tube bottom side up. The brackets are the bottom.

## 2. Attaching the baseplate

Place the baseplate on the bottom tube, bumpers up. Align the bolt holes.

Install and tighten 4 bolts snugly (do not over tighten) using T-handle tool.

Place the 15-foot extension cord into the bottom tube.

Pull 12-18 inches of the extension cord out of the tube.

Flip the assembly over so that the baseplate is now on the ground.

#### 4. Connect power between tubes

Place the upper tube next to the bottom tube, as shown. Make sure that the seam side is facing one another.

Connect the power cord from the upper tube to the extension cord in the bottom tube.

## 5. Install the top tube

Place the top tube onto the bottom tube.

Install and tighten 2 bolts to secure the top tube to the bottom tube.

## 6. Attach head assembly

Feed the head's pigtail through the oval opening on the top of the pivoter.

Align the guide pins of the head with the pilot holes of the pivoter to place the head.

Attach the head assembly using the two front guide pins to line up the bolt holes. Install and tighten two bolts at the rear of the head assembly base to secure it to the pivoter.

## 7. Connect power cords

Push the head assembly forward to maximum forward angle to access the head pigtail and pivoter pigtail.

Connect power cords for light (barrel connector) and iPad (USB-C).

Return the head to the upright position with wires tucked in.

The unit is now ready to power up.

## 8. Power unit

Plug the extension cord into a standard 120 VAC outlet.

The unit's light will cycle white, red, green, blue and then turn off. Once this cycle completes connect the photo booth app to the Bluetooth controller of the unit.

# Bluetooth App Connectivity

As an owner of a Mobibooth photo kiosk, you have access to 10% off on any new Snappic subscription. To take advantage of Mobibooth exclusive savings go to <https://mobibooth.co/getsnappic>.

In this section, we will demonstrate how to connect the Mobibooth RGBW Bluetooth® controller to the Snappic app. A similar interface will be used by apps that have integrated with our controller. These apps include Fotozap, Curator Live, PixBooth, and Touchpix at the time of this writing.

To watch our video walkthrough demonstrating RGB LED integration and the Snappic app please visit <https://youtu.be/KRb83LDxqGE>.

## 1. Open Snappic app

Open the Snappic by tapping the app icon on the iPad's screen.

## 2. Log into your account

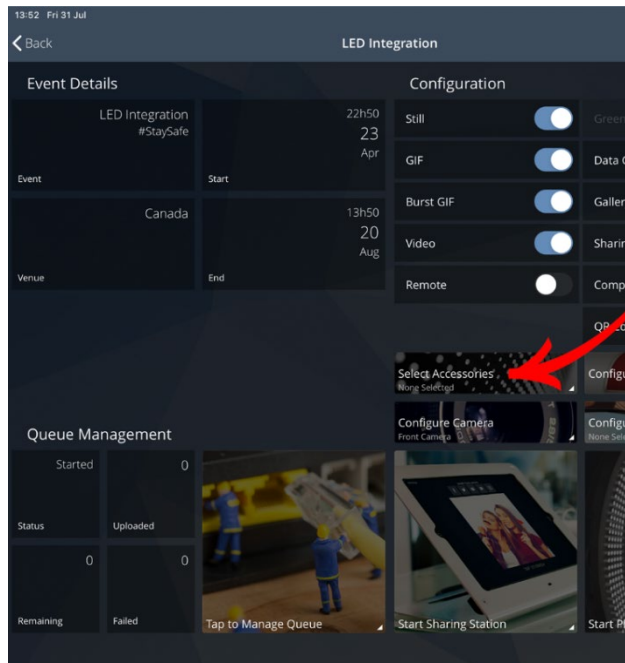

Log into the app using your Snappic credentials. If you have not created an account, you can do so at <https://events.getsnappic.com>.

Once you have logged into the app it will remember your account credentials and automatically log you in upon launch.

### 3. Select your event

Select the event to use by tapping it in the events list.

### 4. Select accessories

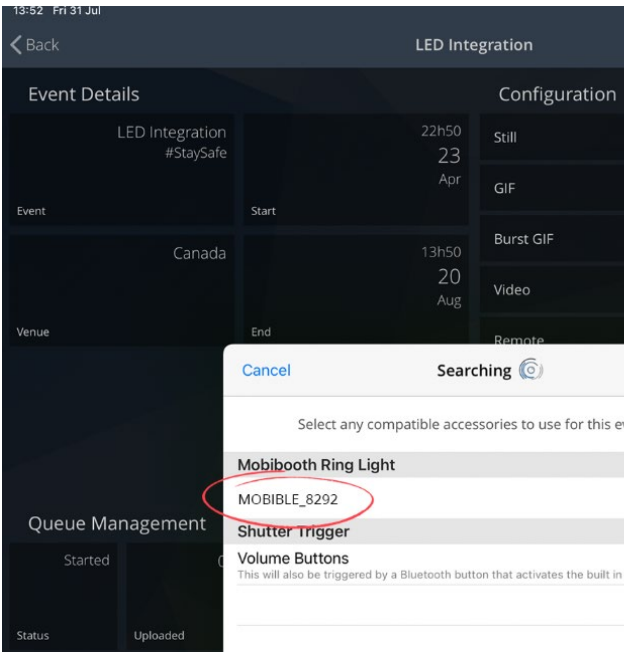

Tap Select Accessories on the screen.

This will bring up a list of all available Bluetooth devices.

Your Mobiboost will start with MOBIBLE\_.

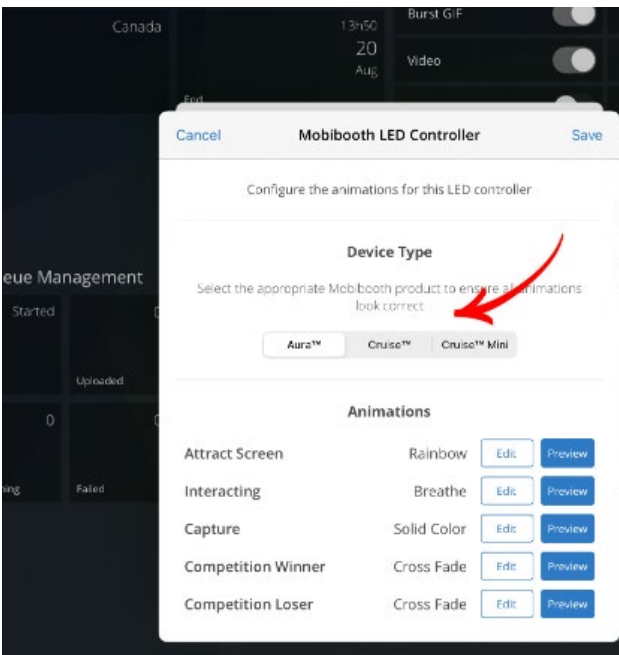

## 5. Select your Mobibooth controller

In the pop-up locate the Mobibooth Ring Light section.

Pair with your Mobibooth tap the device listed there.

## 6. Device type selection (not

It is no longer required that you specify a device type as the firmware in the hardware knows this.

## 7. Editing animations

Animations		
Attract Screen	Rainbow	<a href="#">Edit</a>
Interacting	Breathe	<a href="#">Edit</a>
Capture	Solid Color	<a href="#">Edit</a>
Competition Winner	Cross Fade	<a href="#">Edit</a>
Competition Loser	Cross Fade	<a href="#">Edit</a>

Once connected to the Bluetooth controller the app is able to customize several app states.

To edit an app mode, tap the Edit button.

Tapping Preview will trigger the current LED settings to execute.

# How to Pack Your Mobibooth Aura™

1. Make sure case is on a level surface.

2. Place head assembly in bottom of case.
